

## Switch On To Efficiency

To forge a built environment that is more energy-efficient, more sustainable and more pleasing to work and live in by harnessing the power of the Internet of Things (IoT), Big Data and Artificial Intelligence (AI)

## Eniscope Air Ambient

A specialist energy saving device for HVAC units, combining accurate temperature band control with intelligent on/off scheduling capabilities.

The Air Ambient is the evolution of our highly successful ACES 2 product. A plug-and-play lot solution that allows AirCon systems to optimize their performance considerably.

1. Super-fast install and commission.
2. Up to 3 HVAC systems per device.
3. Works in tandem with Air Sense to accurately maintain temperature.
4. Logic-based schedules and controls.
5. Intuitive Cloud-control system.
