Switch On To Efficiency

To forge a built environment that is more energy-efficient, more sustainable and more pleasing to work and live in by harnessing the power of the Internet of Things (IoT), Big Data and Artificial Intelligence (AI)

Eniscope Air Digital

Cloud-control for three-phase devices of all types, allowing close control for your most energy-intensive assets.

The Air Digital is a sleek, quick to install product that adds intelligence and control to your assets. Schedule them to come on and off on a dynamic schedule, avoiding unnecessary consumption, or trigger control based on logical parameters (like occupancy or light provided by Air Sense).

1. Super-fast to install and commission.

2. Execute high-value energy saving strategies.

3. Deliver additional operational benefits on-site, like alarms and indicators.

4. Water & gas meter consumption tracking.

5. Intuitive Cloud-control system.
